

AGRI 2

CONCENTRATED - MULTIPURPOSE WETTING AGENT

DESCRIPTION

Agri 2 is a concentrated blend of biodegradable, non toxic surfactants and an effective anti foam agent. It was designed to be used with agricultural chemicals, wettable powders, liquid fertilizers and growth enzymes, oil in water concentrates, or anywhere an increase in wetting or penetrating ability is required. Other uses include fire fighting, soil and water conservation, septic tanks, road contractor (dust settling), dirt race tracks (softening and dust settling), nursery work (reducing compaction from planting machines and shovels when planting), golf courses (for treating compacted areas or hard ground) and pressure washing where only a nonionic cleaner can be used.

The reduction in surface tension when *Agri 2* is used in water solution and its unique ability to provide penetrating and rewetting ability suggest very broad uses for this product. It can penetrate hard, compacted soil to help break it up and allow better penetration of water. The solution applied to plants provides a complete wet out on the leaf for better control and chemical use.

The anti foam agent in *Agri 2* helps to prevent tank foam and aeration in spray lines which can cause skipping and accelerated pump wear.

Agri 2 is biodegradable, non toxic, nonionic, non flammable, and contains no phosphates or glycol products.

USE RATIOS

- For soil application: 16-32 ounces per acre.
- For herbicides and pesticides: Consult the directions for the specific product being used (generally 1:1000).
- Fire fighting: 1:1000 to 1:5000 parts of *Agri 2* in water.
- General purpose wetting: Use 1:1000 in water.

SIZES

Agri 2 is available in one gallon bottles, five gallon pails, thirty gallon and fifty-five gallon drums.
