

PRODUCT INFORMATION

Hand and Arm Cleaner

Professional Formula - *Liquid Hand and Arm Cleaner* was designed for the person that gets really dirty, and needs a fast acting, but gentle hand cleaner that will not leave the skin stripped of essential oils, thereby helping to prevent drying and cracking of the skin. Kebro has formulated this product to liquefy and emulsify grease and oil from the skin, lift and disperse hard to remove particulate soils like brake dust and carbon. This hand cleaner will work equally well in hard or soft water.

Skin Conditioning - This hand cleaner contains skin conditioning agents and an effective antiseptic ingredient (PCMX) , that aides in retaining natural, healthy skin qualities instead of the over dry feeling associated with most heavy duty hand cleaners.

Biodegradable - *Liquid Hand and Arm Cleaner* contains no solvents or toxic ingredients which could cause environmental problems. In fact, it actually helps to keep shop drains and sink traps clean of grease buildup due to its amazing ability to emulsify grease.

Prevents Bonding Of Soils To Skin - When applied to skin in small quantities before work, this hand cleaner will act as an invisible glove that helps keep dirt and grease from bonding to the skin. This dramatically speeds cleanup of the hands after work.

How To Use - Simply apply a small amount of *Liquid Hand and Arm Cleaner* to the hands and work in well, to loosen the soil, then add a small amount of water, continue to wash, and watch the grime drop off quickly. This product is water activated, and once water is added to the formula, the dirt is released quickly. Rinse the hands thoroughly and dry well to prevent chapping.

Available Sizes - *Liquid Hand and Arm Cleaner* comes in 8 oz., 64 oz., 1 gallon, 5 gallon, 30 gallon and 55 gallon containers.
