

## **SYNTHETIC PAO EP 2 GREASE**

BRAD PENN® Synthetic PAO EP 2 Grease is a high performance extreme pressure (EP) NLGI #2 grease. It combines synthetic polyalphaolefin (PAO) base oil with a lithium complex soap and a state-of-the-art additive system to provide extra protection and extended service life over a wider temperature range, making it an outstanding automotive and industrial grease.

BRAD PENN® Synthetic PAO EP 2 Grease is compounded with a PAO base oil whose wax-free nature allows for low temperature pumpability and very low starting torque values. It is formulated with a superior additive package that provides exceptional wear protection under high loads (60lb. Timken), good oxidation stability, excellent salt water resistance, and superior resistance to water washout. The unique physical properties of the synthetic base oil combined with it's superior additive package, provides enhanced high and low temperature performance, while the complex thickener system delivers excellent mechanical stability and a high dropping point.

BRAD PENN® Synthetic PAO EP 2 Grease is ideally suited for severe automotive applications such as a wheel bearing and chassis lubrication, as well as for general automotive applications. It exceeds the requirements of ASTM D-4950 Service Classifications GC/LB. It is also recommended for high and low temperature EP industrial applications or where a Mack MG-C product is specified.

## BRAD PENN® Synthetic PAO EP 2 Grease – Typical Properties

| NLGI Grade  |             | 2               |
|---|-------------|-----------------|
| ISO Grade of Synthetic Base Oil                                     | Test Method | 46 / 68         |
| Appearance  | Visual      | Smooth          |
| Color   | Visual      | Light Amber     |
| Thickener Type (soap)   | ASTM D-128  | Lithium Complex |
| Thickener Content, wt.%   | ASTM D-128  | 10.0            |
| Dropping Point, °F (°C)   | ASTM D-2265 | 525 (274)       |
| PAO Base Oil Viscosity, cSt @ 40°C                                  | ASTM D-445  | 83.6            |
| PAO Base Oil Viscosity, cSt @ 100°C                                 | ASTM D-445  | 13.8            |
| Viscosity Index   | ASTM D-2270 | 125             |
| Cone Penetration @ 77°F<br>Worked, 60X<br>Worked, 10,000X, % Change | ASTM D-217  | 280<br>±10      |
| Oil Separation, % (max)   | ASTM D-1742 | 10              |
| Water Washout, wt.% loss @ 175°F                                    | ASTM D-1264 | 8               |
| Rust Prevention, rating   | ASTM D-1743 | Pass            |
| Bomb Oxidation after 100hrs, psi drop                               | ASTM D-942  | 3               |
| Four-Ball Weld Point, kgf (min)                                     | ASTM D-2596 | 250             |
| Timken OK Load, lbs.  | ASTM D-2509 | 60              |
| Product Code  |             | 7813            |
