

AutoTrans Super LV™

Product Description

AutoTrans Super LV™ is a low viscosity, fully synthetic, automatic transmission fluid that supports performance requirements of today's newer automatic transmissions, including General Motors, Honda, Hyundai, Ford, Kia, Mitsubishi, Nissan, Saab, Toyota, Volkswagen and others. **AutoTrans Super LV™** is suitable for severe service applications (up to 50,000 miles) and for extended drain intervals in normal service applications (up to 100,000 miles). It offers excellent corrosion resistance to all types of metals used in transmissions, plus provides superior friction retention and thermal and oxidation stability. **AutoTrans Super LV™** can be used in a broad variety of multi-vehicle applications found in on- and off-highway service as well as marine and industrial applications.

Product Features and Benefits

Friction modifiers control lock-up rates of clutch packs for proper transmission shifting characteristics and efficient power transfer.

Controls seal deterioration to limit fluid leakage.

Specifically formulated for extra wear control and rust protection for longer equipment life.

Special detergent/dispersant additives limit formation of sludge and varnish deposits which interfere with proper transmission operation.

Multi-grade for optimum performance during cold starts and high temperature operations, including start/stop severe service.

Formulated to be compatible with the metallurgy used in most modern transmissions.

Provides efficient heat removal from clutch surfaces to extend clutch life and reduce clutch shudder in modulated torque converters.

Full synthetic for longer fluid life and faster oil flow in low temperature operation.

Typical Applications

Supports the performance requirements of:

Aisin Warner 3324	Honda Type 3.0	MB 236.17
Aisin Warner AW-1	Honda ATF DW-1	Mitsubishi ATF J2
Audi/VW TL 052 162-X	Hyundai/KIA SP-IV	Mitsubishi SP-IV
Audi/VW TL 052 162-Y	Hyundai/KIA SP-IV-RR	Mitsubishi Dia Queen ATF J3
